

Quickbooks is by far the top accounting software provider among American businesses, with millions of users and estimates of around 85-90% of the business accounting market. Invariably, an integration with Quickbooks is a necessity for any business. AppShark's app for Quickbooks is the integration solution with Salesforce that offers users a simple way to sync their data between the two systems.

This integration enables users to track their Customers, Sales Orders and Invoices within their Salesforce CRM in real time. It also allows Tracking of sales, invoices status (paid, sent), and commission calculations per individual sales person or distributor.

The user can view data for the following objects as a part of the Quickbooks-Salesforce integration

- Accounts
- Invoices (including line items)
- Sales Orders (including line items)

The Quickbooks - Salesforce Integration pack is offered along with AppShark's Quick Start Implementation package

**Pricing Starts at \$ 600 per year**
